

I absolutely love xm satellite radio. I had stopped listening to the radio completely until I got xm satellite radio. My choices are wonderful, no stupid DJ,s to contend with, great news and information stations, comedy when you need a lift, and weather at my finger tips.I am so sick of when something finally comes along that is good for the public then someone in the government has got to screw it up.

It well worth the money each month ! Leave xm satellite radio alone, finally someone is giving the public what they want and need.
